

At the core of our operations is the ability to combine the best of our people, risk, technology, and data services. We do this through transparency and a coordinated approach to serve our customers with end-to-end, flexible, and scalable integrated security solutions.

FOCUS

Our team has years of deep knowledge and understanding of the Transport and Logistics sector, and we remain focused on providing a comprehensive list of security solutions specifically tailored to your needs. Whether it be for rail security or security such as bus, train, or subway, we can help provide the security transportation services you need.

PARTNERSHIP & CUSTOMISED SOLUTIONS

We work with municipal organisations, local law enforcement, property and business owners to ensure commuters and travelers are safe and provide a great customer service experience. With our Risk-Based Approach to security, we also develop solutions for the specific needs of your inventory supply chain security and strategically deploy people, systems, and technology to minimise disruption and risk.

SAFETY

Keep your business safe and secure while helping to mitigate risk while safeguarding your property and assets by having a physical and visible presence. We can help prevent reoccurring problems, assist with concerns of vagrancy, increase passenger safety and compliance, monitor suspicious activity, and deliver package reporting.

TRAINING

We provide building security services across the board in key areas such as First-Aid/CPR/AED, emergency preparedness, and access control and management.

Our understanding of the Transport and Logistics sector fundamentals and our partnerships with some of the top online retailer's logistics and distribution hubs, ensure we stay in tune with the industry's most recent developments - always enhancing your company's brand and providing peace of mind for those with who we interact.

STRATEGY

We understand the concerns and challenges your business faces and we partner with transportation, transit, and logistics systems of all sizes.

OUR COMMITMENT TO CUSTOMERS

- ▶ **Easy to do business with:** With proven tools and processes we continue to find new ways to bring value to our customers
- ▶ **Unprecedented transparency:** Integrated business intelligence systems along with artificial intelligence driven workforce management tools provide our customers with unmatched insight into our services
- ▶ **The best hires for you:** Expanding our recruiting network, implementing sophisticated hiring tools and utilising the latest communication technologies ensure we support our customers with the most qualified, engaged, and motivated workforce

G4S INTEGRATED SECURITY

At the core of our business is the ability to combine the best of our people, risk, technology, and data services. We do this through transparency and a coordinated approach to serving our customers with end-to-end, flexible, and scalable integrated security solutions in any sector.

Applying a Risk-Based Approach

What do you **need to protect**?

What do you **need to protect it from**?

How do you most **effectively protect it**?

INTEGRATED SECURITY

Identifying the right mix of services to deliver a truly integrated security solution

RISK SERVICES

TECHNOLOGY & DATA SERVICES

PEOPLE SERVICES

Drive long-term customer value

PROFESSIONAL PEOPLE SERVICES

Our security professionals are recruited and carefully screened according to their talents, qualifications, experience, temperament and background. Whether a location requires security professionals to protect facilities or respond to incidents, operators or analysts to synthesise data, our team of security professionals is committed to delivering superior customer service.

- ▶ Supply Chain Security Consulting
- ▶ Investigations and Intelligence
- ▶ Threat, Disaster, and Emergency Response
- ▶ Executive Protection and Global Travel Services
- ▶ Asset and Vehicle Tracking

THE G4S RISK ASSESSMENT

Using our unique Risk-Based Approach, we assist our customers to build, customise and develop security risk management and mitigation programmes that are suited to their individual needs and environments.

We facilitate this through business development risk-based conversations using our G4S Risk Assessment tool, exploring the true security needs of your organisation.

This allows us to identify significant security risk exposures and the options available to help mitigate those risks.

The output of the G4S Risk Assessment is our unique G4S Risk Radar Report which identifies a set of potential risk types that you should pay the most attention to in your security risk management decision-making process.
