

An ALLIED UNIVERSAL Company

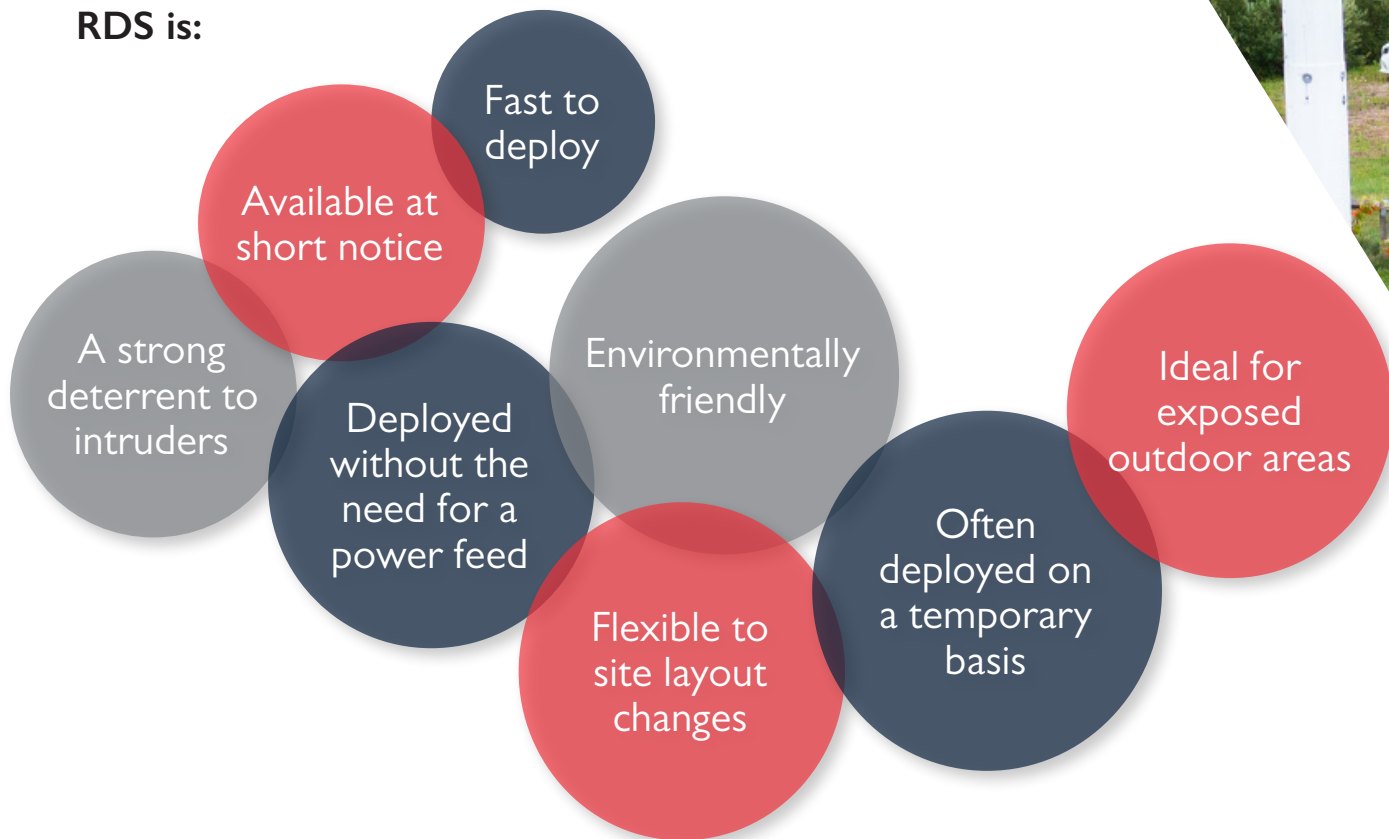

Rapid Deployment Surveillance
Fast, flexible security

“ Supported by 24*7*365 real time monitoring, our team is permanently on hand to co-ordinate a physical response when you need it most. ”

**Rapid Deployment Surveillance
represents a fast and flexible security
solution when you need it most.**

WHY CONSIDER RAPID DEPLOYMENT SURVEILLANCE (RDS)?

RDS is:

WHEN SHOULD YOU CONSIDER RAPID DEPLOYMENT SURVEILLANCE

If you are faced with any of these scenarios, it may be time to consider Rapid Deployment Surveillance.

Are you:

Hosting an event and need 'eyes on' difficult to secure areas?

Facing temporary or urgent need for security?

Suffering from anti social behaviour in car parks?

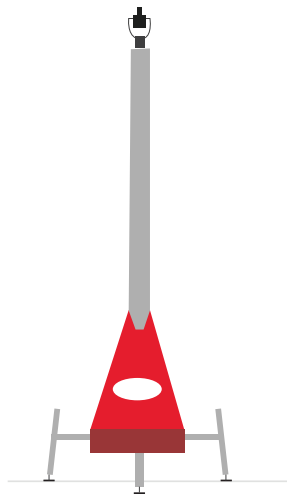

Operating with expensive assets left outdoors?

Operating with a dynamic and changing site that makes installing permanent infrastructure difficult?

Looking for an alternative to permanent security office site presence?

HOW DOES IT WORK?

CCTV Tower

G4S Response

Customer Response

1

Your towers are sited in non intrusive locations

2

They remain in permanent connection with your control room and/or our Security Operations Centre

3

We monitor your facility in realtime on a 24/7 basis and take action when required

4

When required, we coordinate a physical response, liaising with emergency services, your staff or our mobile response teams where appropriate

FLEXIBLE SOLUTIONS

We offer a range of solutions to suit your operating environment.

PRODUCTS IN DETAIL

ULTRA HYBRID

Features Include:

- Eco-friendly - meet your environmental objectives
- Self powering - no power source required
- Object recognition - to avoid false alarms
- Tricky terrain - this unit can be installed anywhere
- Imposing 8m height - effective intruder deterrent
- 1km peripheral range - meaning fewer towers are required to cover your site
- Optional audio announcements - Audio challenges, Police siren and LED spotlights provide a significant intruder deterrent

The Ultra Hybrid tower cleverly utilises solar energy via custom, integrated solar panels, located on the towers' base, to charge its on-board battery pack – without any reduction in tower features or functionality.

An eco-friendly hydrogen fuel cell is also included as a reliable, back-up power source. Combined with our wireless detection and communications, our Ultra Hybrid is a stable, emission free and robust security & management solution, that can be installed on any site, anywhere.

ULTRA

Features Include:

- 100 hr Battery Back Up - ideal for mission critical environments that require surveillance even when power is lost
- Object recognition - to avoid false alarms
- Tricky terrain - this unit can be installed anywhere
- Imposing 8m height - effective intruder deterrent
- 1km peripheral range - meaning fewer towers are required to cover your site
- Optional audio announcements - Audio challenges, Police siren and LED spotlights provide a significant intruder deterrent

The Ultra system is an impressive 8m tall to provide a maximum deterrent from intruders.

With its modular design, the Ultra can be erected anywhere, even over the most difficult terrains. The Ultra features a 100-hour battery back-up so you're covered even if your site loses power. This tower also comes complete with advanced infra-red and spotlight cameras that deliver exceptional quality, day or night. With 24/7 recording, you can rest assured that your site is completely covered for any possible incidents.

MAX TOWER

Features Include:

- 12 hr Battery Back Up – ideal for mission critical environments that require surveillance even when power is lost
- Object recognition - to avoid false alarms
- Tricky terrain - this unit can be installed anywhere
- Imposing 8m height - effective intruder deterrent
- 1km peripheral range - meaning fewer towers are required to cover your site
- Optional audio announcements - Audio challenges, Police siren and LED spotlights provide a significant intruder deterrent

The Max Tower is an impressive 8m tall to provide a maximum deterrent from intruders. With its modular design, the Max Tower can be erected anywhere, even over the most difficult terrains.

The Max Tower features a 12-hour battery back-up so you're covered even if your site loses power. This tower also comes complete with advanced infra-red and spotlight cameras that deliver exceptional quality, day or night. With 24/7 recording, you can rest assured that your site is completely covered for any possible incidents.

PRODUCTS IN DETAIL

LITE

Features Include:

- 100 hr Battery Back Up - ideal for mission critical environments that require surveillance even when power is lost
- Object recognition - to avoid false alarms
- Tricky terrain - this unit can be installed anywhere
- Imposing 8m height - effective intruder deterrent
- 1 km peripheral range - meaning fewer towers are required to cover your site
- Optional audio announcements - Audio challenges, Police siren and LED spotlights provide a significant intruder deterrent

The Optosafe Lite is the market's first temporary, wireless CCTV and alarm system. As with all of our products, the Lite can be rapidly deployed on a short term basis. The Lite is ideal for smaller sites or compounds that require temporary CCTV or alarm support.

Due to the compact size, the Lite can be deployed almost anywhere including stands, shipping containers, walls or any other solid surface.

With 24/7 recording, you can rest assured that your site is completely covered for any possible incidents.

VERIFEYED

Features Include:

- Day / night camera - For 24/7 surveillance
- Object verification - to reduce disruption caused by false alarms
- Online portal - for surveillance footage and fleet monitoring
- Weather proof- operates successfully in outdoor environments
- Powerless operation - ideal for sites where no power access is available

Verifeyed is designed to protect vulnerable areas where CCTV is either too expensive to install or inaccessible. Verifeyed addresses common issues around poor photo quality and detection range.

The battery powered, wireless design ensures that the system is up and running in just a few minutes.

The web based customer portal makes it easy to keep an eye on your sites 24/7. We store images for 12 months so you will have access to all captured footage and time-lapse footage.

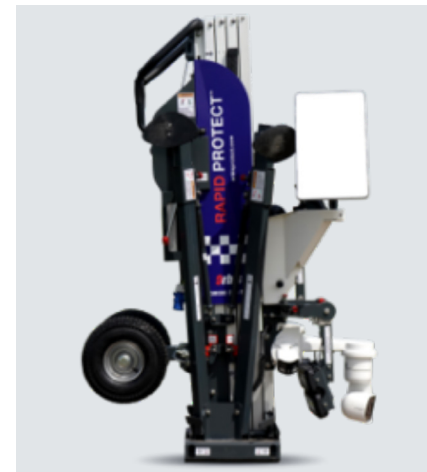

RAPID PROTECT

Our Rapid Protect solution is ideal for emergency situations regardless of operating environment.

By combining industry-leading technology with intelligent AI monitoring, this system provides 360° vision. Flood lighting, solar power, audio challenge and Starlink network connectivity make this a complete protection solution, providing next-level security where you need it most.

Features Include:

- 6.5m tall with powerful floodlighting and audio challenge capability
- Fixed 180° degree cameras (50m range) and PTZ camera (150m range) for live intruder tracking
- Powerful beam LED lighting with max capability of 97,000 lumens. (Max 775 watts. Voltage input to the unit will be 100-240v AC)
- Unlimited data, dual roaming SIM with optional Starlink satellite capability for poor network areas
- Solar or mains-powered with a failsafe battery back up. (5 days main battery, 6 hours backup standby and up to 5 hours lights on main battery)

SENTRY PROTECT

The Sentry Protect system is a technologically advanced wireless security system that can be rapidly deployed to sites that require an effective visual deterrent and flexible on-site positioning.

This system provides ultra-fast image transmission speeds from site to operator, ensuring any possible issues can be actioned in real-time. In the event of an intruder on site, this system also features both live and pre-recorded audio voice challenge to further deter would-be trespassers.

Features Include:

- Long-range detection through 70m 360° range, supported by 4G or 2G mobile network connections
- Robust and rugged to suit any outdoor or large indoor space, with up to 4-year battery life or solar power options.
- Highly visible to provide an effective visual deterrent
- High resolution image capture technology and video analytics, supported by AI object recognition
- Remotely accessed in real-time by our Alarm Receiving Centre (ARC) team, where a specialist operator reviews for potential breaches
- Property owners can access through a dedicated App.
- Live and pre-recorded audio challenges
- LED lights and night vision to cope with low light levels
- A range of peripherals available
- Installation across the UK within 24 hours

MOBILE RESPONSE SERVICES

HERE WHEN YOU NEED US.

Where your sites require urgent physical assistance, our security operations centre will act swiftly to assist.

Our remote security services are supported by mobile response teams. Our nationwide Mobile Guarding services are built on our vast network of vehicles, around the clock control centre and dedicated security officers, ready to attend your site, whenever you need us.

Our officers are equipped with SMART technology which transfers information in realtime, providing you with simple, easy to consume information as your services are fulfilled, wherever you are located.
