

**G4S - YOUR NATURAL  
CHOICE FOR DESIGNING  
AND INSTALLING FIRE  
& SECURITY SYSTEMS**

**G4s is the world's leading integrated security company. We offer a broad range of fire and security services delivered as a single, multi-service or integrated system.**

In the UK we employ over 25,000 people to deliver services that create a safe and better environment in which millions of people live and work.

G4S is one of the UK's leading designers and integrators of fire and security systems, identifying and solving challenges for large scale projects across the public and private sectors.

Using the knowledge of our experienced design team, we can design full fire and security solutions to meet all specifications across all sectors

Also, using both our own products and those of our trusted fire and security partners, G4S can provide a fully integrated solution that can meet individual needs across all sectors within the UK.

G4S is an innovative total fire and security solutions company, bringing together years of expertise and industry knowledge. It has a dedicated commitment to excel in the design, supply and commissioning of all fire and security solutions, meeting the latest standards and customer expectations, while delivering unrivalled quality within both timeline and budget requirements.

Throughout our M&E journey, we have developed strong partnerships with customers to gain a clear understanding of their needs. As with any major project, the right design and management is vital.

G4S has the necessary experience using our dedicated project management and installation teams across the UK to deliver. Our teams have been together in the industry for many years and have experienced and completed some of the largest fire and security projects within the UK and Europe.

At G4S we pride ourselves on our personalised approach and service, working closely with our customers to achieve the best possible solutions to meet all requirements. We have the latest accreditations for both the products and services we supply, ensuring we are highly reliable and deliver the highest quality.

Major construction projects demand a significant investment and resource. G4S unrivalled expertise, and history in delivering integrated fire and security solutions ensures your projects are delivered on time and on budget with minimal risk.

**Functionality and ease of use are integral to the design of a high quality fire or security system for every end user.**

G4S takes full design responsibility in line with the detailed specification, allowing us to fully commit to the end goal of providing the best solution for your project, to the highest standards.

At G4S we have worked alongside many M&E contractors, across varied locations, providing them with the best solutions for each individual project. We will design a system to suit your specific building requirements and install it to function in the way that you want.

Our priority is to deliver a system that will protect your building and comply with all the relevant latest fire and security standards.

A vital part of our service is system design. From the information that you provide, we can create a bespoke system designed around the specific needs of your project.

We produce working drawings for both security and fire alarm installations and our in-house CAD facility bring these plans to life allowing G4S to always have the flexibility to offer something different,

Our dedicated system design team can provide a practical and effective solution to meet specific requirements and has the resources to plan and prepare concepts and detailed designs for the most complex integrated system.

Our designers are trained and certified to a very high standard and are experts in professionally evaluating our customer's needs to produce compliant designs. These focus on providing value added solutions to offer the best design for any budget.

G4S is constantly developing strong relationships with many leading manufacturers to ensure our dedicated design team is provided with continuous training, to grow their competency and provide the team with all the tools they need to stay ahead.

**At G4S, our in house project management team is very experienced in all types of installation.**

We use dedicated project managers on all our M&E installations. This provides continuous support to our valued clients, allowing one main point of contact to maintain easy day to day running of the site combined with ease of communication.

All our Installation and commissioning engineers hold relevant qualifications and experience in addition to health and safety training and annual asbestos awareness training, so as to have the ability to work on all M&E site projects. G4S are fully up to date with the accreditations required.

For new M&E projects we have an excellent understanding of the construction process and take a considerate approach. We understand that good communication is essential to delivering projects on time, on budget and to a high standard.

We have a proven track record of completing all types of sector projects (office blocks, MOD, retail, education, sports stadiums etc.) within all the parameters set.

With our in-house account managers, project managers, engineers and design team working in collaboration on each and every project, our involvement from design to completion ensures installation is a thorough and swift process.

In-depth knowledge of the system requirements and specifications across the teams allows G4S to complete handovers and end user training on time every time.

At G4S we believe that working with us as your M&E fire and security specialist will allow peace of mind that the project will be designed, installed, commissioned to the very highest standard and within time and budget.
