

# Remote Site Support Services

## G4S Risk Management Group

G4S Risk Management Group is the specialist protective services business within G4S Plc. We help our customers succeed by designing and delivering cost efficient risk management services and decision support that enables them to conduct their business safely and successfully in complex, low-infrastructure and challenging environments.

Our organisational scale, operational experience and global supply chain networks enable us to overcome low levels of public infrastructure and utilities to provide a best-in-class service and hospitality experience to our clients working in Fragile and Conflict Affected States.

■ **Reliable**

■ **Innovative**

■ **Trustworthy**

# Remote Site Support Services

## Our Approach

### Life Support in Afghanistan

Our clients demand solutions that deliver a reliable, safe, comprehensive and productive service. Unsafe practices impact the Anjuman Secure Business Park occupies 36000 sq m, of which 7000 sq m is accommodation and working space for clients and G4S personnel. We provide full life support and facilities management at Anjuman Secure Business Park through dedicated in-house Facilities and Logistics management and staff. Our support provision includes electrical power and water supply, UPS system and generator maintenance, cleaning and sanitation, grounds maintenance, laundry, food supply and catering. Specialist services include waste management and disposal, fuel, specialist M&E services including air-conditioning systems, vehicle and plant maintenance and repairs. Medical services are provided by our in-house GP and nurse practitioners, including primary, secondary and trauma care, as well as daily clinics and dispensing.

We manage the supply chain through procurement hubs in UK, Dubai and Karachi supporting international purchasing requirements, and through trusted partnerships for local purchase. All suppliers are managed under formal Quality Assurance standards and in accordance with our Code of Business Conduct.
